Landscape Architect	Openwork - <a href="http://www.openwork.info">www.openwork.info</a>
Design & Install	Fytogreen Australia - <a href="http://www.fytogreen.com.au">www.fytogreen.com.au</a>
GRC Manufacturer	Satu Bumi - <a href="http://www.satubumi.com.au">www.satubumi.com.au</a>

## Project Background

Southbank Place is a stunning 54 storey residential apartment building with 593 apartments and exceptional residence facilities located in the heart of Southbank.

This high quality apartment building includes spacious apartments in a number of different configurations in conjunction with exclusive resident facilities on the 9th and 41st floors that include an indoor pool, yoga studio, gymnasium and a 14 seat theatre.

These facilities also include an expansive resident lounge with dining area and a landscape bar-b-que terrace both of which have spectacular views.

## Satu Bumi's Involvement

Satu Bumi was engaged by Fytogreen to supply seventy five GRC (Glass Fibre Reinforced Concrete) planters for the project in a combination of charcoal, natural grey concrete and natural white concrete finishes and in a variety of medium to large sizes.

Fytogreen managed the installation of the planters on site and all the planters were manufactured with high commercial grade GRC using Satu Bumi's CityScape technology.

Fytogreen is an industry leader and innovator in horticultural technologies in Australia.

Fytogreen offers a unique capability to design bespoke greening solutions and works collaboratively with clients, architects, landscape architects and consultant project teams to deliver high quality landscaping solutions.

Satu Bumi works collaboratively with Fytogreen to deliver world class commercial grade GRC planters.

*The high quality results achieved with the landscaping elements of this project by Fytogreen were the result of their professionalism, horticultural expertise and project management skills.*

*Therefore, Satu Bumi was proud of its collaborative involvement with Fytogreen in the manufacture and supply of the GRC planters for the project.*
