CASPIAN RESIDENTS - HAMPTON

Key Participants

Builder	Figurehead Constructions - www.figurehead.com.au
Architect	BayleyWard - www.bayleyward.com
Landscape Architect	Jack Merlo - www.jackmerlo.com
Developer	Samuel Property - www.samuel.com.au
GRC Manufacturer	Satu Bumi - www.satubumi.com.au

Project Background

Caspian is an uncompromising collection of eighteen oversized, elegantly designed and generously proportioned residences, positioned right in the heart of Hampton.

Defined by graceful and flawless attention to detail, Caspian sets the benchmark for contemporary and intelligent living in one of Hampton's most exclusive and desirable positions.

Inspired outdoor spaces offer Caspian residents enviable al fresco havens that have functionality and low maintenance living in mind.

Each terrace, courtyard and balcony space has been fluently designed to bridge the indoor and outdoor seamlessly.

Satu Bumi's Involvement

Satu Bumi was engaged by Figurehead Construction to manufacture and supply thirty-two large 800mm High GRC rectangle planters ranging in length from 1,100mm to 3,000mm and with varying widths to suite the balustrade set out of the second floor of the building.

Caspian was developed by Samuel Property which specializes in high-end multi-residential property developments; constructed by Figurehead Constructions, that specializes in quality commercial, industrial, and residential construction projects; designed by BailyWard, an award-winning architecture, interior design, and urban design studio; with the landscape design provided by Jack Merlo, one of Australia's most renowned and acclaimed landscape architects.

With such outstanding key project participants, it is not surprising that Caspian has set the benchmark for contemporary and intelligent living in one of Hampton's most exclusive and desirable locations.

This was a high-end project where all the key participants expected the best quality outcomes from everybody involved.

Therefore, Satu Bumi was proud of its involvement in terms of the manufacture and supply of the GRC planters for the project.
